FOR IMMEDIATE RELEASE:

PSYCHIATRIST EXPLORES EMOTIONAL DEVELOPMENT FROM CONCEPTION TO THE FIRST DAYS OF LIFE

Princeton, NJ – January 1, 2010 – How does mother/baby bonding affect relationships later in life? How does the capacity to love develop in humans? How does perinatal care influence society? Greek board-certified psychiatrist, Dr. Theodota Chasapi, will address these critical topics during her presentation, “The Roots of Love & Hate: From Conception to the First Days of Life,” as part of the ACO’s ongoing series of Social Orgonomy talks on Saturday, February 6th at the Paul Robeson Center for the Arts, 102 Witherspoon St., Princeton, NJ from 3:00PM to 5:00PM. Seating is limited and reservations are recommended. Refreshments will be served. Admission is \$45 (\$10 for students under age 25 with I.D.). Call (732) 821-1144 or make your reservation online by visiting <http://www.orgonomy.org>.

Dr. Chasapi graduated from Aristotelion University of Thessaloniki, Greece with an M.D. degree and is board certified by the Greek Board of Neurology and Psychiatry. She maintains a private practice in Thessaloniki and lectures in Greece and the U.S. on perinatal care, natural childbirth, raising healthy children, love and work relationships, the physiology of the newborn infant, and other subjects. She is a founding member and past president of the Hellenic Association of Orgonomy and Editor of the Greek Journal of Orgonomy. Dr. Chasapi is available for interviews prior to the event.

"Treatment of a Pregnant Woman with Panic Attacks", 2004

Publications:

Articles:

"Breast-feeding: An Orgonomic Perspective", The Journal of Orgonomy, 33 (1/2):1999

Dr. Chasapi is the mother of two children.

THE AMERICAN COLLEGE OF ORGONOMY

About the College

The American College of Orgonomy (ACO) is a nonprofit educational and scientific organization located near Princeton, New Jersey, that is devoted to setting and maintaining standards for work in the field of orgonomy, the science developed by Dr. Wilhelm Reich.

The College conducts a postgraduate medical orgonomy training program for qualified physicians and psychiatrists. Medical orgonomists offer a unique form of treatment that is based on a scientific understanding of the connection between the mind and the body. This approach effectively treats a wide range of emotional illnesses, usually without medication.

Elsworth F. Baker, M.D., a psychiatrist who trained and worked with Dr. Reich, founded the ACO in 1968. Reich, a student and colleague of Sigmund Freud, discovered that all living things contain an energy that he called, "orgone energy." He originated the science of orgonomy based on his scientific observations. Today, this science informs an energetic understanding and approach to psychiatry, medicine, biology, the physical and social sciences, and atmospheric environmental research.

The ACO also offers its Social Orgonomy Training Program which applies orgonomic principals to the social realm. In addition to its professional educational programs, the College sponsors conferences, a speakers' bureau, lectures, and laboratory courses for professional and interested laymen. The ACO conducts and supports basic and applied research, publishes *The Journal of Orgonomy*, a newsletter, and is a source for books about orgonomy.

For more information about the ACO, its activities, programs, referrals or training programs, contact:
